nett price	**189.00 $**
Availability	**Always on stock**
Product code	**A150X**
EAN	**5907222689257**

Product description

New release (May 2025)

Raptor XR range extender designed for DJI PLUS 2 Controller - Full-sized, panel-type, directional antenna delivered as a complete solution to extend (even up to 4x !) the range of your drone. Working in concurrent dual band (2.4 + 5 GHz), and perfectly matched with DJI PLUS 2 controllers, enhances the signal strenght, expands the range and delivers crystal-clear video even at the furthest distance of your drone's route.

No need to modify the drone and the controller, so you always can return to your stock (factory) antenna setup.

Set includes all you need to install, connect and work with Raptor XR antenna with your DJI RC PLUS 2 Controller.

Installation takes just about a minute of your time. Simply detach the stock antennas and replace these with our Raptor panel antenna, using included stainless steel mounting bracket (all screws and keys included) and pair of connection cables with SMA-MCX adapters. Additional 3D-printed sleeves will prevent the cable connectors from playing, ensuring a solid connection.

Features:

- Maximize performance
- Concurrent dual band 2.4 & 5GHz
- No modification to the drone itself
- Long range extension without external boosters
- Design does not contain any removable parts
- Complete solution
- Controller NOT included
